THINGS TO THINK ABOUT

How are you going to use your new audio transfers?

- Your CDs will play on any home, portable or auto CD player and most DVD players.
- MP3 files combine high-quality audio with small file size, and are ideal for sharing with friends, uploading to social media, etc.
- Order BOTH — then you'll be ready for both options.

COPYRIGHT INFORMATION: if you have home recordings to transfer — no problem; for copyrighted recordings (commercial records, CDs, etc.) which you have purchased, the law allows you to make only **ONE** duplicate on a different medium; for such material -- we'll prepare *one* CD copy of your original audio for your own use, and return both recordings to you. Copying a commercial CD to another CD without permission is a violation of copyright law.
