THINGS TO THINK ABOUT

How are you going to view your new video transfers?

- DVD player and television set: a traditional DVD will work fine, and — although DVDs may eventually become obsolete — they'll give you years of viewing enjoyment.
- Smart phone, Ipad, tablet or laptop: “MP-4” is best — state-of-the-art video files which combine high-quality video with small file size.
- Order BOTH — then you'll be ready for both options.

Interested in EDITING?

- DVD discs cannot be edited: the video is “fixed” on the disc, in the order it was recorded
- MP-4 files can be edited, re-ordered, shortened, etc. on your computer, tablet, Ipad or even smartphone! You can download software for “video production” — with music and graphics!

Copyrighted recordings: if you have home recordings to transfer — no problem; for copyrighted recordings which you have purchased, the law allows you to make ONE duplicate on a different medium (i.e. VHS to DVD): for such material -- we'll prepare one copy of your video for your own use, and return both recordings to you.
