

## Audio Transfer & Copying

We can convert audio recordings from most old formats to modern CDs and MP3 audio

(we are unable to handle 8-track tapes, micro-cassettes and 78 rpm records at this time)

**AUDIO TRANSFERRING:** converting old analog sound recordings is done in "real time" (a 60-minute tape takes one hour to copy)

### **THINGS TO THINK ABOUT**

How are you going to use your new audio transfers?

- Your CDs will play on any home, portable or auto CD player and most DVD players.
- MP3 files combine high-quality audio with small file size, and are ideal for sharing with friends, uploading to social media, etc.
- Order BOTH — then you'll be ready for both options.

**READY TO ORDER??** Please [CONTACT US](#) so we can discuss your project!

**COPYRIGHT INFORMATION:** if you have home recordings to transfer — no problem; for copyrighted recordings (commercial records, CDs, etc.) which you have purchased, the law allows you to make only **ONE duplicate on a different medium**; for such material -- we'll prepare *one* CD copy of your original audio for your own use, and return both recordings to you.
